

ANNUAL FUGITIVE DUST CONTROL REPORT – 2021

HOOSIER ENERGY RURAL ELECTRIC COOPERATIVE, INC.

MEROM GENERATING STATION

5500 Old 54 West

Sullivan, Indiana

January 19, 2022

Pursuant to 40 C.F.R. §257.80(c), the owner or operator of a Coal Combustion Residual (CCR) landfill must complete an annual Fugitive Dust Control Report. The first of these reports must be completed no later than 14 months after placing the initial CCR Dust Control Plan in the facility's operating record in accordance with 40 C.F.R. §257.80(d). Subsequent Fugitive Dust Control Reports are due within one year of the previous report.

This report satisfies these requirements for the Merom Generating Station.

The annual Fugitive Dust Control Report must address the following three items:

Description of the action taken by the owner or operator to control CCR fugitive dust

- Hoosier Energy and its contracted landfill operator have adhered to the Dust Control Plan, dated October 19, 2015

Record of all citizen complaints

- No citizen complaints have been received since the previous Fugitive Dust Control Report

Summary of any action taken

- Not applicable
